COMPANY

Company Profile

Alpha Next Inc.

2026 Edition | English Translation

Cloud infrastructure. Cybersecurity. Digital transformation.

Our Philosophy

"Creating tomorrow's everyday standards through technology."

In a rapidly changing society, our mission is to turn technology from something difficult into something people can depend on every day. By understanding each client's business and delivering resilient, adaptable IT infrastructure that can keep expanding, we contribute to sustainable development.

Message from the President

Thank you for your continued support. Since our founding in 2006, Alpha Next has supported the IT infrastructure of many businesses under our philosophy of creating tomorrow's everyday standards through technology.

Cloud, AI and security technologies never stop evolving. Yet we believe that a sincere commitment to our clients' challenges remains essential, however far technology advances. We look beyond fashionable terms to identify the next step that truly benefits your business, then do the practical work to deliver it. That is the Alpha Next approach.

With technical expertise and integrity, we will continue creating new everyday standards for our clients and society. We look forward to your continued trust and support.

Alpha Next Inc. Taichi Yamada, President & Representative Director

Company Profile

Certifications & Partnerships	ISO/IEC 27001 (ISMS) certified PrivacyMark registered AWS Select Tier Services Partner Microsoft Solutions Partner
Industry Membership	Japan Information Technology Services Industry Association (JISA)

Our History

2006 Alpha Next was founded in Shibuya, Tokyo, launching server implementation and maintenance services.

2009 Launched infrastructure services based on virtualization; headcount exceeded 30.

2012 Established the Cloud Division and joined the AWS Partner Program.

2014 Opened the Osaka Branch and expanded service delivery across western Japan.

2016 Achieved ISO/IEC 27001 certification and established the Security Division.

2018 Established a Security Operations Center offering 24/7 coverage.

2020 Launched DX consulting, opened the Fukuoka Office and grew to more than 150 employees.

2022 Increased capital to JPY 120 million and began operating the Nagoya data center.

2024 Launched generative AI adoption support and obtained PrivacyMark registration.

2026 Moved the head office to Iwamotocho, Chiyoda-ku, Tokyo, consolidated the development center and reached 248 employees.

Our Services

Cloud Infrastructure

We design and build cloud architectures around your requirements, with a focus on AWS, Microsoft Azure and Google Cloud. From on-premises migration, including lift-and-shift and rearchitecting, to containers, serverless systems and Infrastructure as Code, we support the entire journey to modern infrastructure.

Cybersecurity Solutions

As cyberattacks become more sophisticated, ongoing investment in security is essential. We provide layered defenses, from vulnerability assessments and penetration tests to zero-trust architecture, EDR and SIEM operations, round-the-clock staffed SOC monitoring and incident response with CSIRT support.

Digital Transformation & Development

We help map business processes and clarify challenges, automate work with generative AI and RPA, and build core systems, business applications and web services from scratch. From planning and development through adoption, we help turn data into business value. Agile delivery lets us respond flexibly to rapidly changing requirements.

Managed Operations & Maintenance

Our managed services extend beyond implementation to long-term reliability. They include 24/7 monitoring and initial incident response, regular patching, capacity management and improvement proposals through monthly reports. Working as an extension of your IT team, we reduce operational workload and improve service quality.

How We Deliver

01 Discovery	We discuss your environment, challenges, budget and schedule. Initial consultation is free.
02 Proposal	We present suitable solutions, indicative costs and options for comparison.
03 Implementation	A dedicated team designs, builds and develops the solution, with regular progress meetings.
04 Testing & migration	We plan quality assurance and production migration to minimize business disruption.
05 Operations	We provide ongoing monitoring and improvement to support long-term reliability.
06 Improvement	We analyze operational data and recommend the next practical steps.

Costs and Engagement

Requirements discussions and initial quotations are free. Detailed assessments, when needed, are quoted separately. Implementation projects use individual contracts. Managed services have a minimum 12-month term, followed by monthly cancellation options.

Implementation payment terms are normally 30% at commencement and 70% on acceptance. Managed-service fees are normally due at the end of the following month. Requirements and terms are agreed individually.

The website's cost estimator provides indicative JPY ranges rather than a quotation. Actual scope, permissible downtime and internal resources affect final costs.

Leadership

President & Representative Director	Taichi Yamada
Senior Managing Director & CTO	Kenji Sato
Director & Head of Sales	Misaki Suzuki
Director & Head of Administration	Makoto Takahashi
Director & CISO	Yuki Watanabe
Full-time Audit & Supervisory Board Member	Masaaki Ito
